PROFESSIONAL SUMMARY

Data Analyst and AI/ML Engineer with hands-on experience in manufacturing analytics, real-time operational monitoring, and dashboard automation gained across management-trainee roles in industrial operations. Skilled in Python, SQL, and Power BI for building dashboards, automating reporting workflows, and analyzing production and operational data; contributed to computer-vision-based (YOLOv8) production monitoring initiatives spanning multi-camera surveillance and industrial tracking. Currently supporting leadership decision-making at Bagla Industries through operational data analysis. BE in Computer Science, seeking Data Analyst, AI/ML Engineer, Data Scientist, or Business Intelligence roles.

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy, Data Cleaning, Data Analysis, ETL Concepts

AI / Machine Learning: Machine Learning, Computer Vision, YOLOv8, OpenCV, NLP Basics, Deep Learning Fundamentals

BI & Visualization: Power BI, DAX, Dashboard Development, KPI Reporting, Data Visualization

Databases & APIs: SQL, REST APIs

Cloud & Tools: AWS Basics, Git & GitHub, Docker Basics, Excel

Core Domains: Manufacturing Analytics, Real-Time Monitoring, Production Optimization, Predictive Analytics, Business Intelligence

PROFESSIONAL EXPERIENCE

Management Trainee — Bagla Industries Private Limited **August 2026 – Present**

- Analyze operational and production data using Python, SQL, and Power BI to support leadership decision-making.
- Contribute to real-time monitoring initiatives across a 10-camera surveillance network on the production line, improving operational visibility.
- Collaborate cross-functionally to identify workflow inefficiencies and propose data-backed improvements.

Management Trainee — BG Electricals & Electronics India Ltd **December 2025 – August 2026**

- Built Power BI dashboards for production monitoring, downtime analysis, and operational KPI tracking.
- Automated manufacturing data analysis workflows using Python and SQL, reducing manual reporting effort.
- Performed uptime and downtime analysis across production lines to improve equipment utilization and process visibility.
- Assisted in developing AI-powered monitoring solutions for manufacturing operations, contributing to a real-time, 10-camera tracking initiative on the production line.
- Collaborated with cross-functional teams to translate raw operational data into actionable business insights.

PROJECTS

AI-Based Production Line Monitoring System — Python, YOLOv8, OpenCV, Computer Vision

- Designed a 10-camera AI monitoring system using YOLOv8 for worker activity tracking and object counting on the production line.
- Integrated computer vision models for real-time detection and production analytics.
- Planned a scalable deployment architecture for live monitoring dashboards and automated event reporting.
- Improved operational visibility through automated production tracking.

Manufacturing Downtime Analytics Dashboard — Power BI, SQL, DAX

- Built an interactive Power BI dashboard for downtime, uptime, and bottleneck analysis.
- Automated KPI calculations using SQL and DAX.

- Enabled production teams to monitor operational efficiency in real time.

Python Automation & Analytics Projects — Python, REST APIs, Excel

- Developed Python-based automation scripts for manufacturing data processing and reporting.
- Built data analysis workflows for operational insights and KPI monitoring.
- Worked with REST APIs and Excel data processing to build automated reporting pipelines.

EDUCATION

Bachelor of Engineering (B.E.), Computer Science — Eklavya University **August 2020 – August 2024**

CERTIFICATIONS

- IBM Python for Data Science
- SQL (Intermediate)

ACHIEVEMENTS / ADDITIONAL INFORMATION

- Delivered manufacturing analytics dashboards used for operational reporting at Bagla Industries and BG Electricals & Electronics.
- Contributed to AI/ML-based monitoring solutions aligned with industrial automation use cases.
- Combines operations/manufacturing domain knowledge with hands-on data analytics and AI/ML technical skills.
- Open to Data Analytics, AI/ML Engineering, Business Intelligence, Python Development, and Computer Vision roles; available for remote and international opportunities.
