PROFESSIONAL TITLE

Data Analyst | AI/ML Engineer | Python Developer | Power BI Developer

PROFESSIONAL SUMMARY

Results-driven Data Analyst and AI/ML Engineer with hands-on experience in manufacturing analytics, dashboard automation, and AI-powered monitoring systems. Skilled in Python, SQL, Power BI, Machine Learning, Computer Vision, and data visualization. Experienced in building real-time analytics dashboards, automating reporting workflows, and developing AI-based production monitoring solutions using YOLOv8. Strong understanding of data pipelines, operational analytics, and business intelligence with a focus on improving efficiency through data-driven solutions.

TECHNICAL SKILLS

- **Programming & Data:** Python, SQL, Pandas, NumPy, Data Cleaning, Data Analysis, ETL Concepts
- **AI / Machine Learning:** Machine Learning, Computer Vision, YOLOv8, NLP Basics, Deep Learning Fundamentals, OpenCV
- **Visualization & BI:** Power BI, Dashboard Development, DAX, KPI Reporting, Data Visualization
- **Tools & Cloud:** AWS Basics, Git & GitHub, REST APIs, Excel, Docker Basics
- **Core Areas:** Manufacturing Analytics, Real-Time Monitoring, Production Optimization, Predictive Analytics, Business Intelligence

PROFESSIONAL EXPERIENCE

BG Electricals & Electronics India Ltd

Management Trainee – Data & Analytics | Dec 2025 – Present

- Developed Power BI dashboards for production monitoring, downtime analysis, and operational KPI tracking.
- Automated manufacturing data analysis workflows using Python and SQL, reducing manual reporting efforts.
- Performed uptime and downtime analysis for production lines to improve equipment utilization and process visibility.

- Assisted in developing AI-powered monitoring solutions for manufacturing operations.
- Collaborated with cross-functional teams to transform raw operational data into actionable business insights.
- Built reporting systems supporting faster operational and maintenance decision-making.

PROJECTS

AI-Based Production Line Monitoring System

- Designed a multi-camera AI monitoring system using YOLOv8 for worker activity tracking and object counting.
- Integrated computer vision models for real-time detection and production analytics.
- Planned scalable deployment architecture for live monitoring dashboards and automated event reporting.
- Improved operational visibility through automated production tracking.

Manufacturing Downtime Analytics Dashboard

- Built an interactive Power BI dashboard for downtime, uptime, and bottleneck analysis.
- Automated KPI calculations using SQL and DAX.
- Enabled production teams to monitor operational efficiency in real time.

Python Automation & Analytics Projects

- Developed Python-based automation scripts for manufacturing data processing and reporting.
- Created data analysis workflows for operational insights and KPI monitoring.
- Worked with APIs, Excel data processing, and automated reporting pipelines.

EDUCATION

Eklavya University

Bachelor of Engineering (B.E.) – Computer Science | 2020 – 2024

CERTIFICATIONS

- IBM Python for Data Science
- SQL (Intermediate)

ACHIEVEMENTS

- Developed real-world manufacturing analytics dashboards used for operational reporting.

- Built AI/ML-based monitoring solutions aligned with industrial automation use cases.
- Strong ability to combine business operations knowledge with technical analytics solutions.

ADDITIONAL INFORMATION

Open to opportunities in Data Analytics, AI/ML Engineering, Business Intelligence, Python Development, and Computer Vision. Interested in AI-driven automation, analytics engineering, and smart manufacturing technologies. Available for international opportunities and remote roles.
